

Resource Potential Bioenergy

The World Bank and Alternative Energy Development Board (AEDB)-Government of Pakistan are implementing a Renewable Energy Resource Mapping activity covering all of Pakistan. The project is funded by World Bank's Energy Sector Management Assistance Program (ESMAP) and focuses on the assessment of wind, solar and biomass resources, including ground-based data collection, GIS analysis, and geospatial planning. Total budget of the project is US \$ 4.35 million.

Biomass Mapping:

Biomass mapping component of the project will cover the four provinces, however, main focus will be on Punjab and Sindh Provinces. This component will assess the quality and quantity of available biomass and agricultural waste and study the most appropriate and competitive technologies to utilize available biomass for energy production.
